

Placement Statistics for the month of September, 2010

Out-of-home placement is the last option considered when reasonable efforts to protect a child in his or her own home have been exhausted by OCS. The first preference considered in all out-of-home placements for a child or youth is a relative's home. When it is not possible to place a child with a relative it is necessary to place the child in a licensed foster home. Residential care facilities may offer short-term emergency shelter as well as more long-term residential treatment.

Removal Statistics of children in Out-of-home placement for the month of September, 2010.

	Male	Female	Statewide
Count	33	36	69
Youngest	0	0	0

	Male	Female	Statewide
Count	32	30	62
Mean Age	7.3	8.1	7.7
Median Age	6.5	8.0	7.0
Minimum Placements	1	1	1
Maximum Placements	4	18	18
Mean Placements	1.6	3.2	2.4
Median Placements	1.0	1.5	1.0
Minimum Time	0	86	0
Maximum Time	1,838	1,364	1,838
Mean Time	569.1	650.7	608.6
Median Time	390.5	519.5	451.0

Mean is the arithmetic mean average, commonly referred to as the 'average'.

Median is the median average, containing the middle value. Half of the observations are less than this value, and half of the observations are greater than this value.

Placements are the number of times children in OCS Out of Home placement have changed homes.

Time in Care is measured in days.

Data Source: ORCA. Program used to tabulate statistics: monthly_ooh_web.sas.

Data in this report is current as of October 11, 2010. Subsequent reports with the same date parameter will contain up-dated statistics.
